

Fadhli Ardiansyah Anisda

UI/UX Designer

Bekasi, Indonesia | (+62) 81219299192 | fadhliardiansyah@gmail.com

Summary

I am an experienced UI/UX Designer who has worked on multiple projects involving website, mobile app, and game UI design. I specialize in crafting user-friendly interfaces and improving digital experiences. Currently, I am exploring and learning more about the role of Product Manager to broaden my understanding of product development from a strategic perspective.

Work Experiences

Treffix – UI/UX Designer (Full-Time)

Tangerang, Indonesia (Nov 2024 – Current)

- Designed UI for website dashboard and applications, including HRMS, Fleet Management System, and Warehouse Monitoring System.
- Structured and developed Product Requirement Documents (PRDs) to define features, user flows, and technical requirements.
- Created and delegated tasks across cross-functional teams, including developers and UI/UX designers, to ensure efficient workflow and project progress.
- Defined and structured the logic of user flow for each project to ensure clarity, consistency, and alignment with business goals.
- Conducted regular client meetings to discuss project requirements, align expectations, and ensure smooth executions.
- Performed thorough testing of features in the development stage to ensure quality and functionality prior to production release.
- Developed 3D layout designs for warehouses

Tekuton – UI/UX Designer (3 Months Contract)

Tangerang Selatan, Indonesia (Apr 2024 – Jul 2024)

- Created UI Designs for Creoplay (Web3 Marketplace).
- Conduct client interviews for Tekuton to understand their needs and provided suggestions.
- Presented the design result to the UI/UX Lead and collaborated with developer team to assist in implementing the designs.

Nomina Games – UI/UX Designer (Full-Time)

Tangerang Selatan, Indonesia (Nov 2022 – Nov 2023)

- Created a UI Design for landing page, dashboard, mobile app, web3 marketplace, and game UI.
- Present the ideas, research results, and design to Creative Lead, Product Owner, and Stakeholders.
- Developed user flows and information architecture to support both users and the product team in understanding the designed products.
- Task management for UI/UX team to ensure efficient workflow.
